For Immediate Release

Optimum Design Associates Updates ISO Registration

Optimum Design Associates received its updated ISO Certification to the latest ISO 9001:2008 standards.

PLEASANTON, CA – The Quality Management Department at Optimum Design Associates received the formal certification from TUV Rheinland of North America, Inc. that Optimum has met the latest ISO9001:2008 standards. Optimum has been ISO9001:2000 certified since February 4, 2007. Optimum's new registration certificate can be downloaded [here](http://www.optimumdesign.com/download/iso_cert_optimum.pdf) (http://www.optimumdesign.com/download/iso_cert_optimum.pdf).

ISO 9001:2008 adds new requirements to the ISO 9001:2000 qualification, for manufacturers to be certain that their systems produce quality product and are verifiable. The 2008 standard adds requirements that all inspection tools that are software driven are routinely verified/calibrated, that electronic data be protected through security and backup systems and specifies a new closed loop corrective action method.

About Optimum Design Associates

Optimum Design Associates is an ISO 9001:2008, industry leading provider of PCB layout, engineering, and turnkey electronic manufacturing services (EMS). Established in 1991, we continue to meet the challenge of creating complex, high-speed PCB designs for some of the world's leading high-tech firms. Our designers are highly skilled professionals, who are proficient with the latest tools and techniques in this fast-paced industry. For more information, visit <http://www.optimumdesign.com>
